

Microsoft Application Setup for Internal and External Login

The following is for an Entra ID App Registration administrator.

Part 1: Create a new app registration

1. Navigate to https://entra.microsoft.com/#view/Microsoft_AAD_RegisteredApps/ApplicationsListBlade
2. Sign in with your Tenant admin account or appropriate Role based account
3. Create a new registration

The screenshot shows the 'App registrations' page in the Microsoft Entra ID portal. The 'New registration' button is highlighted with a red box. Below the button, the 'Register an application' form is visible. The form includes a 'Name' field with the value 'InvestorOnboarding', a 'Supported account types' dropdown set to 'Single tenant only', and a 'Redirect URI' field with the value 'e.g. https://example.com/auth'.

New registration

Home > App registrations

Register an application ...

* Name

The user-facing display name for this application (this can be changed later).

InvestorOnboarding ✓

Supported account types

Choose the account types that can use this application or access this API

Single tenant only - ▾ Help me choose

Redirect URI (optional)

We'll return the authentication response to this URI after successfully authenticating the user. Providing this now is optional and it can be changed later, but a value is required for most authentication scenarios.

Select a platform ▾ e.g. https://example.com/auth

Register an app you're working on here. Integrate gallery apps and other apps from outside your organization by adding from [Enterprise applications](#).

Redirect URI configuration Supported accounts Settings

A redirect URI, or reply URL, is the location where the Entra authorization server sends the user and delivers tokens once the user has successfully signed in or signed out. [Learn more about what is a redirect URI](#)

To use federated sign-on, including SAML-based sign-on, try [Enterprise applications](#).

+ Add Redirect URI Delete

If you want to view or change implicit grant and hybrid flows settings or front-channel logout URL, please visit the settings tab.

Microsoft Application Setup for Internal and External Login

The screenshot displays the Microsoft Entra ID portal for configuring the application 'PIMInvestorOnboarding'. The left-hand navigation pane includes sections for Overview, Quickstart, Integration assistant, Diagnose and solve problems, and Manage. The 'Manage' section is expanded, showing options like Branding & properties, Authentication (Preview), Certificates & secrets, Token configuration, API permissions, Expose an API, and App roles. The 'Authentication (Preview)' tab is active, showing a 'Redirect URI configuration' section with instructions on how to add a redirect URI. A modal window titled 'Select a platform to add redirect URI' is open on the right, offering choices between 'Web applications' and 'Mobile and desktop applications'. The 'Web applications' section is highlighted with a red box, indicating the selection of the 'Web' platform.

Configured permissions

Applications are authorized to call APIs when they are granted permissions by users/admins as part of the consent process. The list of configured permissions should include all the permissions the application needs. [Learn more about permissions and consent](#)

+ Add a permission Grant admin consent for Digiata

API / Permissions name	Type	Description	Admin consent requ...	Status
Microsoft Graph (4)				...
email	Delegated	View users' email address	No	✓ Granted for Digiata ...
openid	Delegated	Sign users in	No	✓ Granted for Digiata ...
profile	Delegated	View users' basic profile	No	✓ Granted for Digiata ...
User.Invite.All	Application	Invite guest users to the organization	Yes	✓ Granted for Digiata ...

To view and manage consented permissions for individual apps, as well as your tenant's consent settings, try [Enterprise applications](#).
